

RESIDENTIAL GARAGE DOORS

THE
DOOR
WITH
MORE.

STEEL-CRAFT DOOR PRODUCTS LTD.

has been manufacturing residential, commercial and industrial doors since 1963. Our doors are made in Canada for Canada - our products are 100% Canadian and designed to stand up to our unique weather.

WE OVERENGINEER EVERYTHING. EVERYTHING.

Our founder, Art Mihalcheon, was known as a straight shooter and fearless innovator. He refused to use cheap materials and often crafted his own tools and equipment to get the job done. That commitment to quality and ingenuity is what guides our company today. We refuse to work with inferior materials, we make our own parts, and our state-of-the-art manufacturing facility uses innovative technology and employee expertise to ensure superior quality and efficiency. As we call it, our products are proudly overengineered.

*The Contemporary Series in Walnut, see page 32
for more details.*

OUR PARTS DO MORE THAN WORK.

To us, a door is much more than a door. That's why we make sure every part we manufacture is made to the highest quality - to not only work, but to work to the best of its ability. Steel-Craft puts an immense amount of thought and engineering into every part of our doors. When it comes to building the best door, no detail is ever overlooked.

The CarriageCraft Series, see page 14 for more details.

THE THERMOCRAFT SERIES

Steel-Craft's all-purpose garage door is built to exceed expectations while adding a classic look to any home. The ThermoCraft series of garage doors deliver a winning combination of quality construction, excellent thermal efficiency and timeless beauty.

Headroom requirements may vary on doors over 10' high.

THIS INSULATION DOES MORE THAN INSULATE. IT'S A CLIMACORE.

Steel-Craft's ClimaCore insulation is specially engineered to have the highest quality insulation between the panels to provide higher R-Value, better strength and consistent protection from the elements.

The Flush Series, see page 18 for more details.

THE ELITE SERIES IN WALNUT

The Elite Series in Walnut offers the look, feel and texture of real wood without any of the maintenance issues. You can highlight the classic feel of your home while benefitting from the durability of a steel garage door. These doors have a low-maintenance finish that requires no staining or painting and, unlike real wood, they will not warp, shrink, peel, or crack.

Headroom requirements may vary on doors over 10' high.

SOLAR REFLECTIVE COATING

Our special coating systems reflect the sun's rays rather than absorbing them to avoid extensive heat build-up. As a result, the temperature reached on the steel surface is significantly reduced. This organic coating technology increases the lifetime of the door, and is backed by Steel-Craft's industry leading warranty.

SURFACE TEMPERATURE (CELSIUS)		
	LOW WIND (0-2ms-1)	MEDIUM WIND (2 to 6 ms-1)
CHARCOAL	113.3	64.9
STANDARD BLACK	128.4	71.8
STANDARD BROWN	124.6	68.4

THERE'S HARDWARE, AND THEN THERE'S DURAWARE.

Every Steel-Craft component is made in-house by Steel-Craft. Track, hinges, and rollers are made in Canada to handle our Canadian weather. Durable and highly efficient, our parts are made to last.

The Esteem, see page 28 for more details.

OUR
DOOR
YOURS.**

THE STEEL-CRAFT DOOR DESIGNER

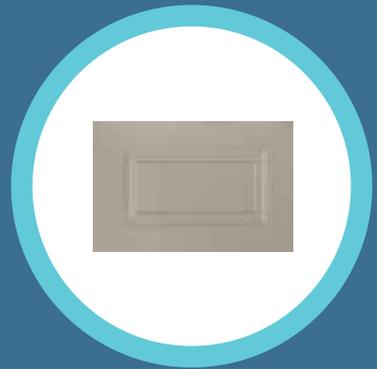

Use our online tool to find the perfect door for your home. You can even customize it to make it truly your own.

Upload a photo of your home.

Choose a door.

Choose a colour.

Add accessories.

Add window options.

Print the photo of your newly enhanced home to bring to your Steel-Craft dealer.

Try out the hardest working door in Canada with an easy-to-use tool.

Find it at steel-craft.ca

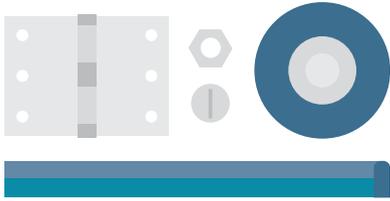

The RanchCraft Series, see page 12 for more details.

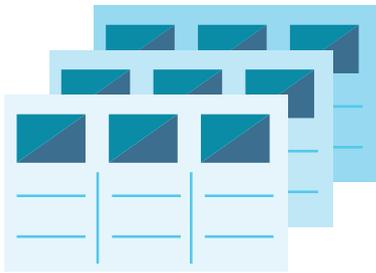

ALL GARAGE DOORS ARE NOT CREATED EQUAL.

At first glance, many garage doors may appear similar. But a door is about much more than how it looks. Steel-Craft products are distinctive in appearance, but more importantly they're born and raised in unique weather, which means we know how to offer better protection from the elements through our overengineering.

BUILT TO LAST

We use the finest quality Canadian galvanized steel finished with primer and exterior polyester paint. This paint acts as a barrier – protecting the underlying zinc coating and extending the life of your garage door.

VIRTUALLY MAINTENANCE FREE

Every door is finished with a factory applied, baked-on, two-coat exterior polyester paint finish on both sides – giving years of maintenance-free operation. The seamless steel inside skin brightens the interior of the garage and is easy to keep clean. The exterior can be finished in any colour.

MADE FOR CANADA

Steel-Craft products are 100% Canadian and are designed for use in Canada. The highest possible grade of perimeter weather-stripping provides excellent protection from outside elements, while a continuous weather seal is inserted between each door section, preventing air from getting through.

ALL BACKED BY OUR UNNECESSARY WARRANTY

Of course all of our doors are backed with a lifetime warranty. But, after thousands of tests performed on all of our parts, we don't think you'll ever need it. In fact, less than 0.01% of our customers ever do. The complete door is covered by an unnecessary warranty against workmanship and material plus a lifetime unnecessary warranty against cracking, splitting or deterioration due to rust.
